Experience

CarTrade Tech Ltd.

Apr 2026 - Present

Software Development Engineer I

Navi Mumbai

- **Spearheaded the integration of Material UI (MUI)** into the enterprise component monorepo; architected a scalable **Theme System** with complex component overrides to achieve 100% design system compliance.automating the transformation of Figma designs into production-ready React components; reduced manual creation time by 85% and ensured 100% design system compliance for CarWale and BikeWale.
- **Orchestrated the CarWale ChatGPT Integration**, engineering a seamless interface between LLM capabilities and automotive data; optimized API response mapping to deliver real-time car discovery features.

CarTrade Tech Ltd.

November 2024 - Apr 2026

Associate Software Development Engineer

Navi Mumbai, India

- **Component Architecture:** Pioneered component-level versioning in the **Oxygen** design system repository, enabling independent updates for 80+ components and reducing integration overhead by 40% across 5+ consuming teams.
- **Campaign Development:** Delivered 40+ high-priority Go-Live Skin Ads Campaign tasks featuring advanced CSS animations and interactive features using vanilla JavaScript with template injection, ensuring cross-browser compatibility through BrowserStack testing under tight deadlines.
- **Automation Engineering:** Architected modular template automation system, eliminating duplicate JavaScript by 80-90% (1-2.5 MB savings) and reducing template creation time from 2 hours to 15 minutes, boosting developer productivity across 3 teams.
- **Infrastructure Enhancement:** Developed an internal operations panel with direct S3 bucket integration for icon/SVG uploads, implementing role-based access control (RBAC) for 50+ team members across different departments, reducing asset deployment time from 2 days to real-time.

Technical Skills

Languages: Java, JavaScript, HTML5, CSS3, MySQL, OracleDB

Frontend: React.js, Redux Toolkit, **Material UI (MUI)**, Styled-Components, Design Systems, Core Web Vitals

AI & Integration: **OpenAI API (ChatGPT Integration)**, REST APIs, JSON Web Tokens (JWT)

Tools & Dev-Ops: Git, Github, Monorepos, Figma Professional, Cursor

Development Methodologies: Agile/Scrum, CodeReview, Responsive Design, Unit Testing, Performance Optimization

Education

Lakshmi Narain College of Technology, Bhopal

2020 - 2024

Bachelor of Technology in Information Technology

CGPA: 8.88/10

Banasthali Vidyapith, Jaipur

2017 - 2019

Intermediate

Percentage: 88.56%

Projects

WhatsChat

August 2024 - September 2024

- Developed a highly interactive **real-time chat application** using **React** and **JavaScript**, focusing on smooth user experiences and efficient component rendering.
- Integrated **Socket.io** to establish full-duplex **WebSocket connections**, enabling instantaneous message delivery, typing indicators, and live user presence features.
- Implemented global state management to handle active chat sessions, user authentication states, and historical message logs seamlessly across components.
- Optimized frontend performance by implementing **lazy loading** for chat history and debouncing input handlers, ensuring lag-free interactions during heavy data streams.
- Crafted a responsive and intuitive layout using modern CSS architectures, prioritizing accessibility and smooth transitions across desktop and mobile viewports.

Coding Profiles & Achievements

Leetcode : Solved 500+ problems across multiple coding platforms

Certifications : Persistent Martian Program — Internship in Java, DBMS, and DSA
