Experience

CarTrade Tech Ltd.

Apr 2026 - Present

Software Development Engineer I

Navi Mumbai

- Built a seamless **design-to-code** pipeline allowing designers to work in Figma while developers generate production-ready **React** pages in one pass using Claude (LLM) and a custom MUI wrapper. Achieved **85–90% accuracy**, driving company-wide adoption and saving **60–70% of UI development effort**. [🔗](#)
- Developed a **Material UI-style component library for React Native** entirely from scratch, encompassing the architecture, theme, palette, and components, achieving the same 85–90% design-to-code accuracy for mobile.
- Engineered the production **ChatGPT integration** for CarWale, building the core interface between OpenAI's LLM and live car inventory to power AI-driven car discovery for **millions of users**. [🔗](#)
- Pitched and built a dynamic **JSON-driven ad injection system**, replacing hardcoded React slots. This automation entirely eliminated the need for manual frontend development and production releases for every new ad campaign across CarWale and BikeWale.

CarTrade Tech Ltd.

November 2024 - Apr 2026

Associate Software Development Engineer

Navi Mumbai, India

- Introduced component-level versioning in the **Oxygen** design system. This allowed **80+ components** to be updated independently, saving **40% integration time** across 5+ teams. [🔗](#)
- Delivered **40+ high-priority ad campaigns** featuring CSS animations and interactive elements using vanilla JavaScript. Ensured everything worked smoothly across all browsers through **BrowserStack** testing.
- Built an automated template system that cut duplicate JavaScript by **80-90% (saving 1-2.5 MB)**. Reduced template creation time from **2 hours to 15 minutes**, improving productivity for 3 teams.
- Created an internal panel for uploading icons directly to AWS S3, adding role-based access for **50+ team members**. This reduced asset deployment time from 2 days to instant updates.

Projects

Cred-Wallet [🔗](#)

May 2023 - June 2023

- Built a full-stack web application using the **MERN stack** (MongoDB, Express, React, Node.js) to securely store and manage credit and debit card details.
- Implemented secure user authentication with **JWT tokens** and bcrypt password hashing to protect sensitive user data.
- Created complete **REST APIs** to handle adding, viewing, updating, and deleting cards, using express-validator to ensure safe data entry.
- Designed a smooth user interface using reusable components, **React Router** for page navigation, and **React Context API** to manage the app's state.

Technical Skills

Languages: JavaScript (ES6+), Java, SQL, HTML5, CSS3, SCSS

Frontend & Mobile: React.js, React Native, Expo, Next.js, Redux Toolkit, Material UI (MUI), Styled-Components

Backend & AI: Node.js, Express.js, REST APIs, JWT, OpenAI API, LLM Integration, MCP, SpringBoot

Tooling: Git, GitHub, Lerna (monorepos), Webpack, Jenkins, Husky, Jest, Figma, Cursor

Practices: Design Systems, Core Web Vitals, Performance Optimization, Unit Testing, Code Review, Agile/Scrum

Education

Lakshmi Narain College of Technology, Bhopal

2020 - 2024

Bachelor of Technology in Information Technology

CGPA: 8.88/10

Banasthali Vidyapith, Jaipur

2017 - 2019

Intermediate

Percentage: 88.56%

Coding Profiles & Achievements

Leetcode : Solved 500+ problems across multiple coding platforms [🔗](#)

Certifications : Persistent Martian Program — Internship in Java, DBMS, and DSA [🔗](#)
